RESEARCH

Interests

Cranio-dental anatomy and evolution of fossil hominins of South Africa, including *Australopithecus* and early *Homo*. Principal focus is on the recently named *Australopithecus sediba* from Malapa and *Homo naledi* from Rising Star in South Africa.

Paleoecology of hominins and their surrounding animal communities. Interactions between environment, ecology, climate and interspecific competition in mammalian evolution; in particular, as relates to hominin evolution.

Isotopic analysis of early hominin diet, and early hominin ranging and reproductive behavior in South Africa. In particular, analysis of dietary patterns of South African hominins via $^{12}\text{C}/^{13}\text{C}$ isotope ratios in dental enamel, in comparison with modern African ecosystems. Analysis of early hominin ranging and reproductive patterns via $^{86}\text{Sr}/^{87}\text{Sr}$ analysis of geological substrates and biotic materials in the Sterkfontein Valley, South Africa.

Field and Laboratory Experience

I have been involved in the excavation, preparation, description, and analysis of vertebrate faunal material, including hominins, from the following South African sites: Malapa, Rising Star, Swartkrans, Sterkfontein, Makapansgat, Taung, Kromdraai, Coopers, Drimolen, Gladysvale, Plovers Lake, Motsetse, Gondolin, Matjhabeng, Mimosa, Buffalo Cave, and Erfkroon. I have been involved in the collection of fossil material from the Pliocene deposits of northern Chad, at the following localities: Koro Toro, Kossum Bogoudi.

TEACHING

My teaching experience resides mainly in the fields of anthropology and human anatomy. In particular, I am qualified to teach general anthropology, biological anthropology, paleoanthropology, primatology, and zooarchaeology. I am also qualified to teach human anatomy for medical students, nurses, and occupational therapists. My anatomical training includes teaching full-body dissection, as well as teaching with prosections. My areas of special interest include African hominin ecology and evolution, taphonomy and zooarchaeology.
