

Matthias S. Maier

Curriculum Vitae

Department of Mathematics
Texas A&M University, 3368 TAMU
College Station, TX 77843, USA
☎ +1 979 845-7554
✉ maier@tamu.edu

Academic positions

- 09/2022 – Associate Professor (with tenure)
Department of Mathematics, Texas A&M University
- 08/2018 – 08/2022 Assistant Professor
Department of Mathematics, Texas A&M University
- 07/2015 – 08/2018 Dunham Jackson Assistant Professor
School of Mathematics, University of Minnesota
- 10/2011 – 06/2015 Research Associate (Wissenschaftlicher Mitarbeiter),
Numerical Analysis Group, Institute of Applied Mathematics
Ruprecht-Karls-Universität Heidelberg

Education

- 06/2015 Dr. rer. nat. with grade summa cum laude
Ruprecht-Karls-Universität Heidelberg
Thesis: *Duality-based adaptivity of model and discretization in multiscale finite-element methods*, supervised by Prof. Dr. Dr. h. c. Rolf Rannacher
- 02/2012 – 06/2015 Member (with research fellowship) of the Heidelberg Graduate School of Mathematical and Computational Methods for the Sciences, Ruprecht-Karls-Universität Heidelberg
- 10/2006 – 09/2011 Diplom (equivalent to M. Sc.) in Mathematics, Ruprecht-Karls-Universität Heidelberg
Final grade: “sehr gut” (excellent)
Minor subjects: Computer Science, Physics
- 10/2005 – 02/2011 Diplom (equivalent to M. Sc.) in Physics, Ruprecht-Karls-Universität Heidelberg
Final grade: “sehr gut” (excellent)
Diplom thesis: *Simulation of Boundary Layer Flow over Riblet Structures*
Minor subjects: Computer Science, Mathematics

Research interests

- Computational fluid dynamics: hyperbolic conservation laws, compressible Euler and Navier-Stokes equations, coupled Euler-Poisson and Euler-Maxwell systems
- *Multiscale effects in Maxwell’s equations*: surface plasmon-polaritons on 2D materials, plasmonic crystals
- *Multiscale methods*: heterogeneous multiscale methods, variational multiscale methods; asymptotic analysis and homogenization theory, model adaptation
- Finite element methods and finite element software

Grants and allocations

- 11/2022 – 10/2025 AFOSR FA9550-23-1-0007 “Robust approximation of hyperbolic-dominated models” (co-PI with J.-L. Guermond and B. Popov), \$ 609,386.
- 09/2021 – 08/2026 NSF DMS 2045636 “CAREER: Robust and high-performance computational methods for simulating metamaterial-based optical devices”, \$ 470 000.
- 06/2021 – 05/2022 TACC Frontera allocation, NSF DMS 21004 “ryujin — towards robust and efficient computation of supersonic hyperbolic flow at large and small scales”, 160 000 SUs (8.96M core hours).
- 09/2019 – 08/2022 NSF DMS 1912847 “Efficient and Adaptive Methods for Simulating Multiscale Effects in Optical Metamaterials”, \$ 125 000.
- 01/2019 – 12/2020 T3 Texas A&M Triads for Transformation, Co-PI with Q. Michaudel and M. Green, \$ 30 000.

Honors and awards

- 2021 NSF CAREER Award
- 2017 Highlight of the Year award, *On the Wiener-Hopf Method for Surface Plasmons: Diffraction from Semi-infinite Metamaterial Sheet*, Studies in Applied Mathematics, 2017
- 02/2012 – 06/2015 Research fellowship, Heidelberg Graduate School of Mathematical and Computational Methods for the Sciences, Ruprecht-Karls-Universität Heidelberg

Software development

- Since 10/2014 Developer, Gentoo Linux Distribution (<http://www.gentoo.org>)
- Since 07/2014 Principal developer and project administrator, deal.II Library (<http://www.dealii.org>)
- 11/2013 – 07/2014 Developer, deal.II Library (<http://www.dealii.org>)
- Since 02/2011 Contributor, Finite Element Toolkit Gascoigne 3D (<http://www.gascoigne.de>)

Submitted journal articles (* with student)

1. D. Arndt, W. Bangerth, M. Bergbauer, M. Feder, M. Fehling, J. Heinz, T. Heister, L. Heltai, M. Kronbichler, M. Maier, P. Munch, J.-P. Pelteret, B. Turcksin, D. Wells, and S. Zampini. The deal.II Library, Version 9.5. *Submitted*, 2023
- * 2. M. Bezbaruah, M. Maier, and W. Wollner. Shape optimization of optical microscale inclusions. *Submitted*, 2023. URL <https://arxiv.org/abs/2306.13248>

Journal articles (* with student)

The list of authors on mathematical publications is predominantly in alphabetical order.

| 3/2023 | Workshop organizer of the <i>Finite Element Rodeo 2023</i> , Texas A&M University, College Station, TX, USA |
| 2/2023 | Organizer (with I. Tomas and J. Chan) of Minisymposium <i>Structure Preserving and Robust Techniques for the Simulation of Transport Phenomena and Fluid Flow</i> , SIAM Conference on Computational Science and Engineering (CSE23) Amsterdam, Netherlands |
| 11/2022 | Organizer (with D. Massatt) of Minisymposium <i>Advances in theory and computation of functional optical materials</i> , SIAM Texas-Louisiana Sectional Conference in Applied Mathematics, Houston, TX, USA |
| Since 9/2022 | Member of the <i>Undergraduate Studies Committee</i> , Department of Mathematics, Texas A&M University, College Station, TX, USA |
| 2022 | Grant review panelist (two times), National Science Foundation |
| 7/2021 | Organizer (with J. Lin) of Minisymposium <i>Mathematical Theories and Computational Algorithms for Novel Optical Materials</i> , SIAM AN 2021, USA (online) |

- 3/2021 Organizer (with P. Cazeaux) of Minisymposium *Frontiers in Material Modeling and Device Simulation: From Nano- to Meso-Scale*, SIAM CSE 2021, USA (online)
- 2021 Grant review panelist, National Science Foundation
- 10/2020 Organizer (with J.-L. Guermond and B. Popov) of Minisymposium *Structure preserving techniques for nonlinear conservation equations*, 3rd SIAM Texas-Louisiana Sectional Conference in Applied Mathematics, College Station, TX, USA (online)
- 10/2020 Organizer (with R. Lipton) of Minisymposium *Analytic and computational approaches for metamaterial and nanoscale optics*, 3rd SIAM Texas-Louisiana Sectional Conference in Applied Mathematics, College Station, TX, USA (online)
- 10/2020 Organizing Committee, 3rd SIAM Texas-Louisiana Sectional Conference in Applied Mathematics, College Station, TX, USA
- 11/2013 – 06/2015 Deputy member of the Diplom Examination Board, Ruprecht-Karls-Universität Heidelberg
- 08/2013 Organizing Committee, 4th deal.II Workshop, College Station, TX, USA
- 08/2012 Organizing Committee, 3rd deal.II Workshop, Heidelberg, Germany

Short courses, research stays and visits

- 01/2020 Visitor, *Workshop on Theory and Computation for 2D Materials*, IPAM, UCLA, Los Angeles, CA, USA, Jan 12 – Jan 21, 2020
- 05/2019 – 06/2019 Visitor, *IMA Workshop on Hydrodynamic Models for Transport in 2D Materials*, University of Minnesota, Minneapolis, MN, USA, May 06 - June 07, 2019
- 06/2017 Invited lecturer, *Advanced topics in *nix software development - toolchain, build systems and software testing*, Short course in the Master in High Performance Computing program, SISSA, Trieste, Italy
- 03/2014 Assistance and exercises, *DAAD Summer School on Numerical Methods with the Finite Element Method*, Universidad Nacional de Trujillo, Peru

Outreach

- 03/2023 *Mathematical Modeling, Fluids, and Airplanes that Shouldn't Fly*, AMUSE Seminar, Texas A&M University, College Station, TX, USA
- 02/2023 *Mathematical Modeling, Fluids, and Airplanes that Shouldn't Fly*, Aggieland Saturday, Texas A&M University, College Station, TX, USA
- 02/2019 *Fractals*, K12 Math Club, Texas A&M University, College Station, TX, USA
- 10/2019 *Potential flow and why does an airplane fly?*, AMUSE Seminar, Texas A&M University, College Station, TX, USA
- 02/2019 *Finite element methods and adaptive strategies for multiscale problems*, Industrial and Applied Seminar, Texas A&M University, College Station, TX, USA
- 10/2016 *Finite element methods and adaptive strategies for multiscale problems*, AMS Student Chapter Seminar, University of Minnesota, Minneapolis, MN, USA
- 4/2016 *Potential flow and why does an airplane fly?*, Undergraduate Math Club, University of Minnesota, Minneapolis, MN, USA

Talks and presentations (last 4 years, * invited talk)

- 4/2023 *Robust and approximation of the compressible Navier-Stokes equations*, Finite Element Rodeo 2023, Texas A&M University, TX, USA *
- 3/2023 *Robust and efficient approximation of the compressible Navier-Stokes equations*, SIAM CSE 2023, Amsterdam, Netherlands *
- 11/2023 *Robust and efficient approximation of the compressible Navier-Stokes equations*, SIAM TX-LA Sectional Meeting 2022, Houston, TX, USA *
- 11/2022 *Robust and efficient approximation of the compressible Navier-Stokes equations*, SIAM TX-LA Sectional Meeting 2022, Houston, TX, USA *
- 10/2022 *Structure-preserving finite-element schemes for the Euler-Poisson equations*, CAM Seminar, University of Tennessee, Knoxville, TN, USA *
- 10/2022 *Robust and efficient approximation of the compressible Euler and Navier-Stokes equations*, CNLS Seminar, Los Alamos National Laboratory, Los Alamos, NM, USA *
- 09/2022 *Robust and efficient approximation of the compressible Euler and Navier-Stokes equations*, GCEC Seminar, University of Glasgow, UK (online) *
- 09/2022 *Structure-preserving finite-element schemes for the Euler-Poisson equations*, AMS Sectional Meeting, El Paso, TX, USA *
- 08/2022 *Robust and efficient approximation of the compressible Euler and Navier-Stokes equations*, Applied and Computational Math Seminar, University of Minnesota, Minneapolis, MN, USA *
- 07/2022 *Robust and efficient approximation of the compressible Euler and Navier-Stokes equations*, Oberseminar Mathematische Strömungsmechanik, University of Würzburg, Würzburg, Germany *
- 07/2022 *Robust and efficient approximation of the compressible Euler and Navier-Stokes equations*, IWR Scientific Computing Seminar, Heidelberg University, Heidelberg, Germany *
- 03/2022 *Efficient parallel 3d computation of the compressible Navier-Stokes equations*, Computational Math Seminar, Clemson University, SC, USA *
- 02/2022 *Optical Phenomena, Resonances, and Homogenization of Layered Heterostructures*, Oberseminar Numerische Mathematik, Bochum University, Bochum, Germany *
- 12/2021 *Efficient parallel 3d computation of the compressible Navier-Stokes equations*, Math Colloquium, University of Houston, TX, USA *
- 11/2021 *Optical Phenomena, Resonances, and Homogenization of Layered Heterostructures*, SIAM TX-LA Sectional Meeting 2021, South Padre Island, TX, USA *
- 05/2021 *Efficient parallel 3d computation of the compressible Navier-Stokes equations*, Oberseminar Mathematische Strömungsmechanik, University of Würzburg, Würzburg, Germany (online) *
- 04/2021 *Efficient parallel 3d computation of the compressible Navier-Stokes equations*, Seminar Special Topics in Numerics, Otto von Guericke University Magdeburg, Magdeburg, Germany (online) *

- 03/2021 *Optical Phenomena and Resonances in Layered Heterostructures*, SIAM CSE, Dallas, TX, USA (online)
- 02/2021 *Resonances in Homogenization of Layered Heterostructures*, DMS Applied Mathematics Seminar, Auburn University (online) *
- 10/2020 *Massively Parallel 3D Computation of the Compressible Euler Equations*, CLASS Seminar, Texas A&M University (online)

- 10/2020 *Massively Parallel 3D Computation of the Compressible Euler Equations With An Invariant-Domain Preserving Second-Order Finite-Element Scheme*, SIAM TX-LA Sectional Meeting 2020 (online)
- 09/2020 *Optical Phenomena and Resonances in the Homogenization of Layered Heterostructures*, Meta-materials 2020 (online) *
- 09/2020 *Finite-element computation of the conductivity feedback of nanoscale optical devices*, AMS Central Sectional Meeting (online) *
- 05/2020 *Parallelization of “stencil-based” methods*, deal.II Developer Hackathon, keynote (online)
- 05/2020 *Some comments on the 9.2.0 release*, deal.II Developer Hackathon (online)
- 01/2020 *2D plasmonic computation of layered heterostructures*, IPAM Workshop on Theory and Computation for 2D Materials, UCLA, Los Angeles, CA, USA *
- 11/2019 *Simulation of Optical Phenomena on 2D Material Devices*, CAAM Colloquium, Rice University, Houston, TX, USA *
- 11/2019 *Simulation of Optical Phenomena on 2D Material Devices*, Applied Analysis Seminar, Louisiana State University, Baton Rouge, LA, USA *
- 11/2019 *Simulation of Optical Phenomena on 2D Material Devices*, Applied Mathematics Seminar, Baylor University, Waco, TX, USA *
- 10/2019 *A Heterogeneous Multiscale Method for Optical Phenomena on Layered Heterostructures*, CCMA 2019, University of Nevada, Las Vegas, NV, USA
- 10/2019 *Simulation of Optical Phenomena on 2D Material Devices*, Analysis and Applied Mathematics Seminar, University of Illinois at Chicago, Chicago, IL, USA *
- 08/2019 *Some comments on deal.II packaging*, 7th deal.II Workshop, Fort Collins, CO, USA
- 07/2019 *Optical Phenomena on Layered Heterostructures*, ICIAM 2019, Valencia, Spain *
- 06/2019 *Duality-based model adaptivity for multiscale finite element methods*, MAFELAP 2019, London, UK *
- 06/2019 *A spectral decomposition approach for the conductivity response of a 2D electron fluid*, IMA Workshop on Hydrodynamic Models for Transport in 2D Materials, University of Minnesota, Minneapolis, MN, USA *
- 02/2019 *Optical phenomena on Layered Heterostructures*, SIAM CSE, Spokane, WA, USA *

Graduate advising

Currently serving on eight graduate committees at TAMU.

Since 1/2023	David Pecoraro, Texas A&M University; Ph. D. program (advisor)
3/2022 – 12/2022	Brett Caldwell, Texas A&M University; Master program (advisor)
Since 11/2021	Jordan Hoffart, Texas A&M University; Ph. D. program (advisor)
Since 09/2019	Manaswinee Bezbaruah, Texas A&M University; Ph. D. program (advisor)
09/2020 – 08/2021	Drew Macha, Texas A&M University; Distance Master program (advisor)
07/2015 – 06/2020	Jung Heon Song, University of Minnesota: <i>Surface plasmon polaritons in waveguide configurations</i> , Ph. D. program (co-advisor); now working for KLA Corporation
05/2013 – 05/2014	Niloufar Rahi, Ruprecht-Karls-Universität Heidelberg: <i>A Priori L^∞-Error Estimation for FE-Galerkin Approximations of linear and non-linear elliptic Partial Differential Equations on Locally Refined Meshes</i> , Diplom thesis (co-advisor)

Undergraduate advising and mentoring

01/2020 – 04/2020	Jack Dahlberg and Jordan Hoffart, Texas A&M University: <i>Numerical study of decay rates of the 1D Klein-Gordon equations</i> , co-advised with Jonas Lührmann, MATH 491 Undergraduate research project
01/2020 – 04/2020	Zhiyu Song, Texas A&M University: <i>Computation of propagating modes in 2D waveguide configurations</i> , MATH 491 Capstone project
06/2018 – 08/2018	Wei Xi Boo, University of Minnesota: <i>Computation of Dispersion Curves for Optical Phenomena in Layered Structures</i> , Undergraduate Research Opportunities Program stipend
01/2018 – 05/2018	Noah Wong, University of Minnesota: <i>Modeling and Simulation of Potential Flow</i> , Independent Study, B. S. program
01/2017 – 05/2017	Victor Wright, University of Minnesota: <i>Linear programming in operations research</i> , Independent Study, B. S. program
09/2016 – 12/2016	Evan Henke, University of Minnesota: <i>Monte-carlo simulation of optimal game strategies</i> , Independent Study, B. S. program

Curriculum development

- Collaborative undergraduate research project (CRP)
 - The CRP program is funded by Career Award DMS-2045636 and organized within a larger Directed Reading Program (DRP) at the Department organized by Dr. A. Shiu. It pairs a team of undergraduate mentees and graduate mentors to work together on a research topic with the goal of teaching core competences in computational sciences and highlighting *collaborative* research.
- Math 676
 - Pioneering project-based, flipped classroom, graduate level course highlighting practical aspects of the finite element method and scientific software development: The course is designed for students involved in research in numerical methods, or students who want to use the finite element method for simulations in their graduate research.

Teaching (Texas A&M University)

- Spring 2023 Finite Element Methods in Scientific Computing (Math 676, 15 students)
 ○ Pioneering project-based graduate level course highlighting practical aspects of the finite element method and scientific software development.
- Fall 2022 Collaborative research program (DRP/CRP, 6 students, 3 teams)
 ○ Undergraduate research for teams consisting of two undergraduate mentees (and a graduate mentor) with an emphasis on teaching core competences in computational sciences and highlighting collaborative research.
- Numerical Partial Differential Equations (Math 610, 8 students)
 ○ Graduate level course covering introductory and advanced topics in numerical analysis of finite difference and finite element approximations of partial differential equations.
- Numerical Partial Differential Equations (Distance course, Math 610, 4 students)
- Fall 2021 Numerical Partial Differential Equations (Math 610, 14 students)
- Principles of Numerical Analysis (Math 437, 18 students)
 ○ Upper-division undergraduate-level course covering introductory topics centered around mathematical principles of numerical analysis and their application to the study of particular methods.
- Spring 2021 Finite Element Methods in Scientific Computing (Math 676, 8 students)
- Fall 2020 Numerical Partial Differential Equations (Math 610, 6 students)
- Spring 2020 Iterative Methods (Distance course, Math 639, 5 students)
 ○ Graduate level course covering development and analysis of iterative methods applied to the solution of large sparse systems of linear equations.
- Fall 2019 Numerical Partial Differential Equations (Math 610, 6 students)
- Spring 2019 Finite Element Methods in Scientific Computing (Math 676, 12 students)
- Fall 2018 Mathematical Modeling (Math 442, 25 students)
 ○ Upper-division undergraduate-level course covering introductory topics in mathematical models based on optimization, dynamical systems and probability theory.

Teaching (University of Minnesota)

- Spring 2018 & Fall 2017 Introduction to Numerical Methods (Math 5485 & 5486, 37 students)
 ○ Upper-division undergraduate-level course sequence covering introductory topics in numerical methods about numerical integration, nonlinear equations, systems of linear equations, ordinary and partial differential equations.
- Spring 2017 & Fall 2016 Numerical Analysis and Scientific Computing (Math 8441 & 8442, 10 students)
 ○ Graduate level course sequence covering introductory and advanced topics in numerical analysis and scientific computing about approximation theory, optimization problems, ordinary and partial differential equations.

Spring 2016

Mathematical Modeling (Math 4428, 30 students)

- Upper-division undergraduate-level course covering introductory topics in mathematical models based on optimization, dynamical systems and probability theory.

Fall 2015

Differential Equations and Linear Algebra (Math 2243, 178 students)

- Introductory undergraduate-level course about linear algebra and ordinary differential equations.
